Experience

Webflow

Senior Software Engineer
Aug 2022 to Present

- Led lifecycle and growth engineering across dashboard surfaces, paywalls, usage visibility, and notifications.
- Launched Webflow's first AI tooling in 2023. Built an internal admin MCP platform with about 20 tools covering billing, entitlements, account state, payments, and observability. Support and engineering use AI-assisted workflows to trace customer issues across multiple sources of truth.
- Took Webflow's per-site Web Application Firewall from proof of concept to a configurable customer-facing product, tied to an estimated $4M self-serve opportunity.
- Rebuilt bandwidth metering and overage lifecycle workflows supporting about $6M in annual incremental revenue. Shipped usage dashboard improvements contributing to an estimated $5M ARR lift through new pricing, packaging, and self-serve upgrades.

MasterClass

Senior Software Engineer
Apr 2022 to Aug 2022

Worked on growth: payments, promotions, subscription conversion, experiments, and a Next.js migration.

HitRecord — Senior Developer — Jul 2019 to Apr 2022

Led frontend modernization and growth engineering during platform relaunch. Built Optimizely experiments for Class Projects launch and improved Angular frontend and Rails backend performance.

Earlier Experience

Plink.ai — Software Engineer — Sep 2018 to Jul 2019
Built TypeScript, React, server-rendered pages, and Node API features for marketing and asset management.

Event Farm — Software Engineer — Sep 2015 to Sep 2018
Led Angular frontend rewrite. Built ticket management and visual page-building tools.

Act-On — Solutions Engineer — Jun 2012 to Sep 2015
Delivered implementation support and built WYSIWYG email, form, and webpage editing tools.

Projects

Codable — Founder & Developer — Jun 2017 to Present

Safari-native iOS developer tool for inspecting, debugging, and testing web content. Elements inspector, Console, Network monitor, and responsive viewport testing.

TabForge

Open-source programming keyboard for iPhone and iPad. Braces, brackets, Tab, indentation controls, and saved snippets beside letter keys. MIT licensed.

Taktung

Vercel deployment status and logs for iPhone and iPad. Production status, visual comparisons, widgets, and Field Log.

Paper & Grain

Origami lessons and free folding for iPhone and iPad.

Education

University of California, Davis — B.A. Communication and Political Science

Technologies

TypeScript, JavaScript, React, Next.js, Node.js, Ruby on Rails, Angular, SwiftUI, SQL, Druid, Datadog, MCP, Git.
